Mary Perry
Cherry Williams

The Town of Many will be conducting our annual chlorine cleanse starting September 15, 2021 through November 15, 2021. We hope to achieve our goal during this time-frame. However, the procedure could take longer. We will be monitoring the chlorine levels daily to regulate the amount of chlorine entering the water system. We kindly thank you for your patience and understanding while we complete this importantly needed process. We have information posted on our Facebook page, and is also published in the Sabine index. To access our webpage type in Town of Many and the profile will pop up. The information posted on our Facebook page has some guidance for water usage during this time. We assure you that the water will remain at a safe chlorinated level. The town's water employees will also be conducting flushing at several fire hydrants throughout town, so please do not be alarmed if you notice hydrants flowing in your neighborhood. The Town of Many will put out a public notice when the cleanse of the system is complete. If you would like a copy of the information please stop by the city hall and we will provide you with a copy. Thank you for your support.
